

CATBPU-600 Polyurethane Tooling Board Technical Data Sheet

DENSITY 580-620 kg/m³ HARDNESS 74-78 SHORE D

DESCRIPTION

Our Tooling Boards are manufactured using Polyurethane and are used in making models, patterns and molds. Lower density PU boards can be hand processed whereas the denser ones require CNC machines.

Product range consists of 10 different models, varying in density between 600 - 1500 kg/m3. These boards come in 18 different dimensions and the maximum size is 2000x1000 mm whereas thicknesses peak at 200 mm. These blocks can be bonded together to achieve even larger size

PROPERTIES

APPLICATION

- Fine surface structure
- Low coefficient of thermal expansion
- Good compressive and flexural strength
- Good compressive and flexural strength

- Master models
- · Cubing models
- Patterns

PHYSICAL PROPERTIES							
Color				Beige			
Density at 23°C		ISO 854	Kg/m ³	580-620			
	MECHANIC	AL PROPERTIES	at 23°C				
Hardness		ISO 868	Shore D1	74-78			
Flexural strength		ISO 178	MPa	15-20			
Compressive strength		ISO 178	MPa	15-20			
Heat distortion temperature		ISO 75B	°C	70-75			
Coefficient of thermal expansion (CTE)		ISO 11359-2	10 ⁻⁶ .°K ⁻¹	50-55			
Standard sheet size							
1500x500x75mm	750x500x50mm						
1500x500x100mm	750x500x75mm						
750x500x100mm	•						

STORAGE CONDITIONS

Store flat in a dry place. Allow time for material to come to ambient temperature prior to bonding or machining.

HANDLING PRECAUTIONS

Normal health and safety precautions should be observed when handling these products:

- Ensure good ventilation to prevent dust or chip accumulation
- Wear gloves, and safety glasses.
- Do not smoke when machining.

Address-685 – Huaxu Highway, Qingpu District, Shanghai, P.R China

CATBPU-700 Polyurethane Tooling Board Technical Data Sheet

DENSITY 680-720 kg/m³ HARDNESS 77-81 SHORE D

DESCRIPTION

Our Tooling Boards are manufactured using Polyurethane and are used in making models, patterns and molds. Lower density PU boards can be hand processed whereas the denser ones require CNC machines.

Product range consists of 10 different models, varying in density between 600 - 1500 kg/m3. These boards come in 18 different dimensions and the maximum size is 2000x1000 mm whereas thicknesses peak at 200 mm. These blocks can be bonded together to achieve even larger size

PROPERTIES

APPLICATION

- Fine surface structure
- Low coefficient of thermal expansion
- Good compressive and flexural strength
- Good compressive and flexural strength

- Master models
- · Cubing models
- Patterns

CATBPU-1200 Polyurethane Tooling Board Technical Data Sheet

DENSITY 1200-1240 kg/m³ HARDNESS 88-93 SHORE D

DESCRIPTION

Our Tooling Boards are manufactured using Polyurethane and are used in making models, patterns and molds. Lower density PU boards can be hand processed whereas the denser ones require CNC machines.

Product range consists of 10 different models, varying in density between 600 - 1500 kg/m3. These boards come in 18 different dimensions and the maximum size is 2000x1000 mm whereas thicknesses peak at 200 mm. These blocks can be bonded together to achieve even larger size

PROPERTIES

APPLICATION

- Fine surface structure
- Low coefficient of thermal expansion
- Good compressive and flexural strength
- Good compressive and flexural strength

- Master models
- · Cubing models
